

NCC Student access to MyMoodle

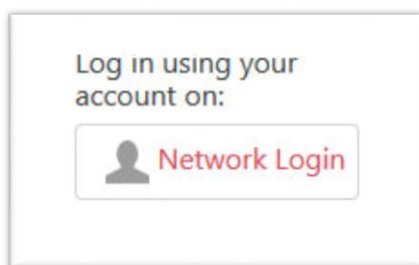

We have moved over to a 'New' Moodle installation [My Moodle].

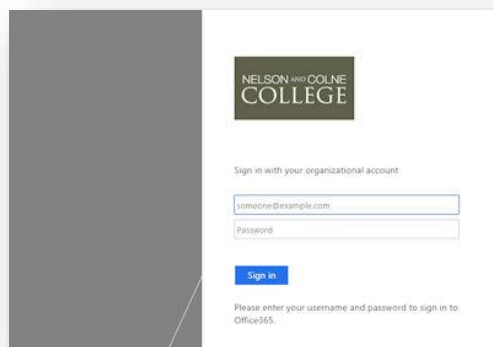

The logging in procedure has changed and students are no longer required to log in with a different username and password than their network login.

To log in:

If in College: from the MyDay page click on the Moodle link tile [see above] and you will be automatically redirected to the login page where you click on 'Network Login'.

If offsite: visit the web address at <https://mymoodle.nelson.ac.uk> and you will be presented with a login page where you choose the 'Network Login' above. When taken to the next screen because you are offsite you need to login using your network credentials....

The format for logging in here is.....

Username: userid@nelson.ac.uk (eg.123456@nelson.ac.uk)

Password: your usual network password

Then click 'Sign In'

This should then redirect you to the 'new' My Moodle homepage where you will be logged in.
